Customer Reviews

I got this workbook for a home schooled 4th grader. I really thought it would kind of follow along with the textbook. But there is very minimal correlation throughout the book. It's almost like they are two different books completely. I ended up throwing away this workbook and made my own worksheets to go along with the text. It's really not appropriate for homeschool unless you do your own worksheets

not what I was expecting but the layout of this book is awful. I opened it and immediately closed it again. Way too much on one page and not enough room to write answers. I thought I was getting a workbook but that isn't what this is.

This is great book before school starts and during school year! teaches so many things and enhances your kid's knowledge for the better.
