Age Range: 9 - 10 years

Grade Level: 4 and up

## Customer Reviews

Since my son started using Beestar online math, he often asks questions about math problems. They are more and more challenging to me. This book came in as a big help. Its friendly question and answer format makes it very easy to use. This book includes very important math topics, such as addition, subtraction, decimals, fractions, multiplication, division, value comparisons and reasoning skills. There are great amounts of practice for equations, word problems, manipulating

fractions, and decimal ordering. What's more, my son likes it because it has very fun themes, like animals and riddles. He's happy to see his own improvement through certificate of completion for each section he finished. My son's math sense is improved significantly since I used this invaluable book. We love it.

Not detailed enough....
