Alternate realities and other worlds are nothing new in the world of comic books. DC has the multiverse, where an infinite number of Earths exist, each with parallel versions of Superman, Batman, and all of the other major players in the world of DC comics. Marvel has the Ultimate universe, which serves as a way to retell the classic stories in a separate, but parallel world to the 616 universe, which is the "normal" Marvel world. There was also the Age of Apocalypse miniseries, in which Apocalypse, in an altered reality, controlled the world, and Magneto was the leader of the X-Men. However, in most alternate reality storylines, the ending seemed to undo everything. The characters remembered nothing of the other world when things went back to normal. Such is not the case in House of M. Wanda Maximoff, also known as Scarlet Witch, is the daughter of Magneto. She and her brother Pietro, also known as Quicksilver, are mutants, and thus have lived a life of

oppression at the hands of humans. It doesn't help that their father is a maniacal terrorist bent on making the world a mutant paradise. Wanda's powers to alter reality have served her well as an Avenger, but lately, they have begun to take their toll on her mind. Prof. Charles Xavier has tried to help her, but she is quickly losing her grip on reality, which means that she could unknowingly alter the reality of everyone around her. Concerned for the safety of the world, Prof. X asks the X-Men and the Avengers to help decide how to deal with the problem. Fearing that Wanda's death is imminent, Pietro asks Magneto to do something, and suddenly, in a bright flash of light, everything changes.
