Age Range: 5 - 6 years

Grade Level: Kindergarten and up

Customer Reviews

We have purchased both division and multiplication cards. I can't say exactly that my son is enthralled by the experience of learning the multiplication table, but it certainly makes it easier. These are good quality cards covering numbers from 0 to 12. They are printed on both sides and also have answers on the back (for parents). Overall, we are happy with the purchase.

We bought these after reading good reviews but we prefer the green box set that has one fact per card. These were difficult to separate into factor families at 6. Half were white and half were red and my kid needed my help to get them organized just to start practicing. I have a worse set but I have a better set.

These flash cards have one major flaw: a handful of the cards have the related problem on the back of the same card. So, if you are looking at the 10x3 card, 3x10 is on the back. The answer to the

problem on the back is printed on the front. So on the 10x3 card, the answer $3 \times 10 = 30$ is printed right there. My daughter noticed this immediately.

These work great. I would have liked them better if they had one problem per card instead of two. Other than that, they're perfect.

I bought these same flash cards a few years ago in addition and subtraction. They have held up well to classroom use. I have no doubts these will do the same.

One tool I have found useful for students trying to do better at math. How can you do the hard stuff if you can't do the basics

I bought these cards for my son when he was learning multiplication in 3rd grade. They have worked really well! They are sturdy, you can't see through them and they go through the 12 times tables.

These cards are exactly what you need for multiplication flash cards. They are sturdy! Easy to read! Slick to flip through quickly! Answers on the top corner of the back! One card for every multiple! (6 x 5 and 5 x 6) We started with the x9, and it's so fun to drill my son with these that one day later they are all learned and he is so fast, and I enjoy drilling him with these. Good job!
