Customer Reviews

As a Chinese mom, I buy lots of workbooks for my children. These include Kumon, Singapore, and quite a few others. I am not trying to recommend a specific book company (most of them are decent), but rather to un-recommend the Sprectrum workbooks (I bought 3 of them, all for 6 grade math).1. Books are thin on content - pages are sparsely populated2. Questions are too easy3. Answers have mistake, and the font is often too small to read without a magnifying glassAvoid at

any price

I bought only spectrum for my kids dor their after school intellectual activities.
