In all my studies throughout my childhood, schooling, military service, college, community activities, and charitable organization work. During which I tried to comprehend and understand, our great country and its beginnings. I have found nothing more equal to this book. In my attempt to discern the true meanings of our founding documents and our founders most basic intentions, I began at the end with the Constitution and worked backwards. How much easier it would have been to have Mr. Federer's book at the beginning. Throughout my search and in all the documents and books I have read, I have attempted to understand the inner souls of our founders, their families, their philosophies, their beliefs and their hopes. It saddens me greatly, that I did not have this book to read prior to starting that great and rewarding adventure. For it confirms what it has taken me a youthful lifetime to find out for myself and to develop an in depth understanding which I believe I have finally arrived at. This book is the quintessential prerequisite to understanding the true American

Dream, it's purpose and our founders original intentions in all their thoughts, words and deeds. American youth, parents, administrators, scholars, and politicians need this book to bring them back to the true founders path. That path based upon the realities of their understanding and not the falsehoods of our hypocritical scholars of today. America's God and Country should be required reading in every single school room, every office building, every legal office and should sit on the bench beside every single Judge in this land. Especially the United States Supreme Court whom seem to have completely lost their way, their duty and their limits of interference.
